Summary

I am an undergraduate in Computer Science and Technology at Uva Wellassa University of Sri Lanka, aspiring to build a career as a Software Engineer. I possess a strong foundation in full-stack development, gained through academic projects and self-driven learning. I am passionate about problem-solving, collaborative teamwork, and continuously exploring new technologies to design and develop innovative, high-performance, and user-centric software solutions.

Experience

Software Engineering Intern *May 1, 2026 – November 1, 2026*

DLAD Software Solution, Sri Lanka

- Developed and enhanced web-based enterprise applications using Next.js, Frappe, and Shadcn UI-based components, implementing responsive and user-friendly interfaces.
- Performed functional, role-based, integration, and end-to-end testing
- Actively participated in Agile development lifecycles, collaborating with the engineering team through sprint planning, daily stand-ups, and iterative feature delivery.

Education

Bachelor of Science Honors in Computer Science & Technology *2023-2026*

Uva Wellassa University of Sri Lanka

CGPA:3.72/4.00

Diploma in Information Technology *2022-2023*

ESOFT Metro Campus in Sri Lanka

Research Project

An Agentic AI-Based Personalized Learning Companion for G.C.E. (O/L) Mathematics in Sinhala and English Medium: Evaluating Student Progress and System Effectiveness *2026*

- To implement Agentic AI mechanisms that enable personalized learning experiences through adaptive question and theory generation, dynamically tailored to each student's learning progress and performance level.
- Implement a question generation module to create adaptive and context-based questions.
- To develop a trilingual learning companion system (Sinhala, English and Tamil) capable of guiding students through step-by-step mathematical reasoning.
- Technologies: : React, Tailwind CSS, Node js, Express, FastAPI, PostgreSQL(Neon), Pinecone, CrewAI, OpenAI, Langchain

Projects

Beach Hotel & Coral Reef Tour Booking Platform *2025*

- Overview: A web application that enables users to book hotel rooms and coral reef tours, explore virtual reef experiences, and access personalized dashboards, with full admin panel functionality.
- Technologies: React, Node.js, Next.js, MongoDB, API Integration
- Source: Frontend source code, Backend source code

Clothing Shop Website *2025*

- Overview: Full-stack e-commerce website for managing products, customers, and orders.
- Technologies: React, Spring Boot, PostgreSQL, Tailwind CSS
- Source: Frontend source code, Backend source code

Projects cont.

Pastry Shop Website *2024*

- Overview: Created a responsive and visually appealing front-end project using CSS and React components.
- Technologies: React, Vite, CSS
- Source: source code

Donation system for medical operations(LifeLine) *2024*

- Overview: Developed LifeLine, enabling users to view verified medical cases, make secure donations, engage volunteers, and ensure transparency.
- Technologies: PHP, Bootstrap, MySQL
- Source: source code

Skills

- Programming Languages: PHP | Java | JavaScript | C | Python
- Web Technologies: HTML5 | CSS3 | Bootstrap | Node.js | Next.js | Spring Boot | FastAPI | React.js
- Databases: MySQL | MongoDB | PostgreSQL
- Tools & IDEs: VS Code | Eclipse | IntelliJ IDEA | NetBeans | Git
- Operating Systems: Windows | Linux
- Soft Skills: Communication | Teamwork | Problem-Solving | Adaptability | Analytical Thinking | Time Management | Continuous Learning | Attention to Detail | Collaboration in Agile Environments

Certifications

- Spring Framework for Java Development (certificate on SkillUp, Coursera)
- Developing Back-End Apps with Node.js and Express (certificate on IBM, Coursera)
- Agile Software Development (certificate on LinkedIn Learning)
- AWS Certified Cloud Practitioner (CLF-C02) Cert Prep (certificate on LinkedIn Learning)
- AI/ML Engineer Stage 1 (certificate on SLIIT)
- Develop Generative AI Applications (certificate on IBM, Coursera)
- Build RAG Applications (certificate on IBM, Coursera)
- Generative AI: Prompt Engineering Basics (certificate on IBM, Coursera)
- Learning Docker (certificate on LinkedIn Learning)
- Build REST APIs with FastAPI (certificate on LinkedIn Learning)
- Front-End Web Development (CODL, University of Moratuwa)

Achievements

- Dean's List *2023-2025*
- Winners-SHECODERess v6.0 (Hack & Design Showdown). *2025*

Volunteering

- **UWU EXPO -Uva Wellassa University of Sri Lanka** *2025*
  Collaborated with a team of volunteers, supporting event activities and contributed to the Marker-Based AR project showcased at the event.
- **Pillam(Outreach Program)-Rotaract club, Uva Wellassa University of Sri Lanka** *2023*
  Contributed to a school outreach event focused on improving students' skills and engagement while strengthening my teamwork and communication abilities.
